

Exploring Data Trends: Visualizing Distributions, Relationships, and Comparisons

By: Muhammad Isamu Taqiy Ali

Task 1: Visualizing Data Distributions

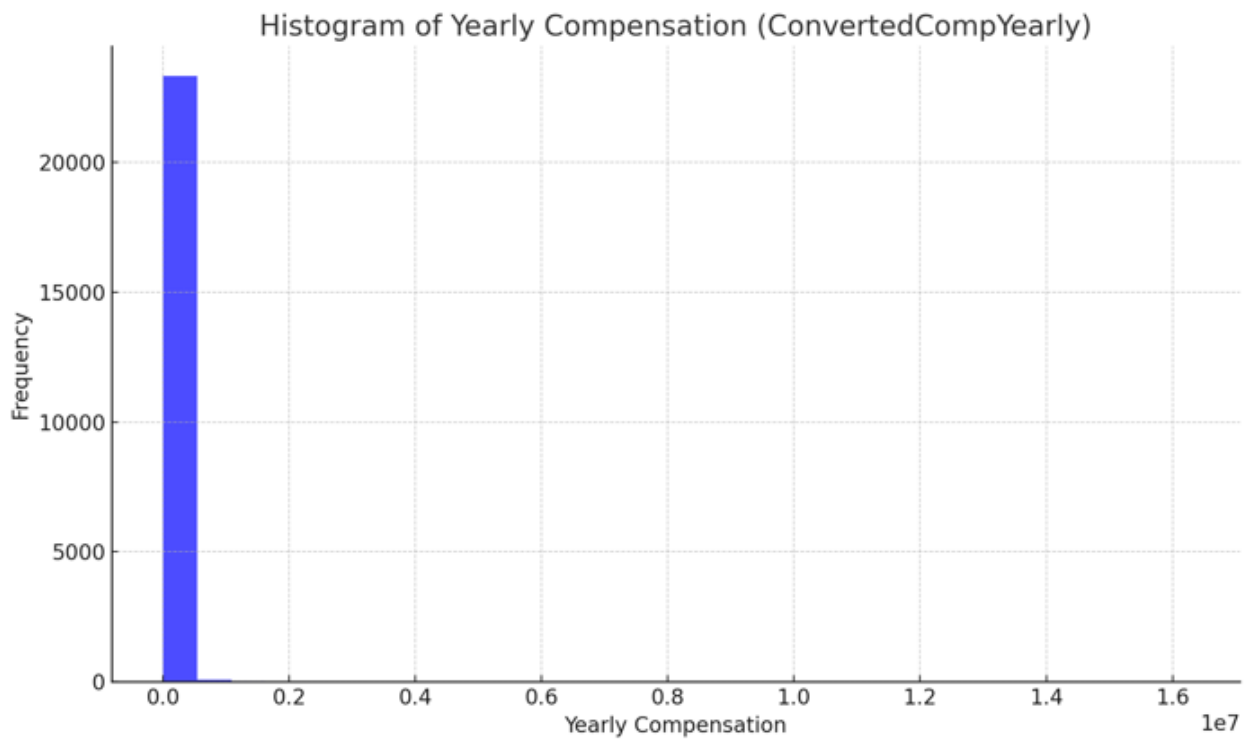

1. Histogram of `ConvertedCompYearly`

Visualize the distribution of yearly compensation (`ConvertedCompYearly`) using a histogram.

2. Box Plot of `Age`

Since `Age` is categorical in the dataset, convert it to numerical values for a box plot.

Task 2: Visualizing Relationships in Data

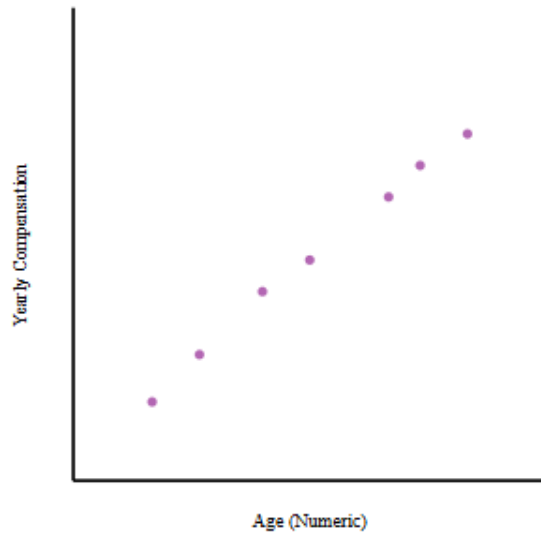

1. Scatter Plot of `Age_numeric` and `ConvertedCompYearly`

Explore the relationship between age and compensation.

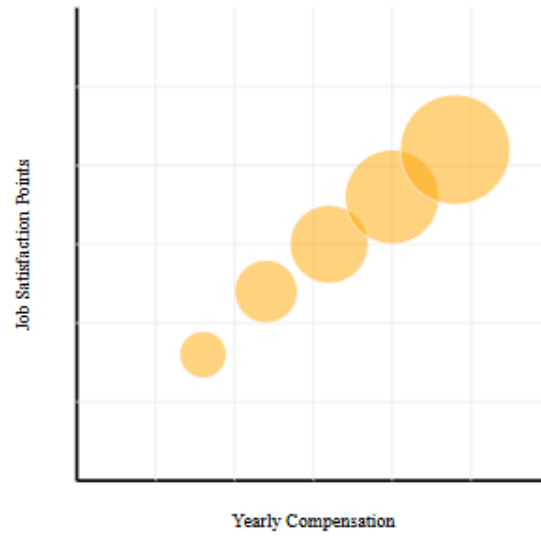

2. Bubble Plot of `ConvertedCompYearly` and `JobSatPoints_6` with `Age_numeric` as Bubble Size

Explore how compensation and job satisfaction are related, with age as the bubble size.

Age vs Yearly Compensation

Compensation vs Job Satisfaction

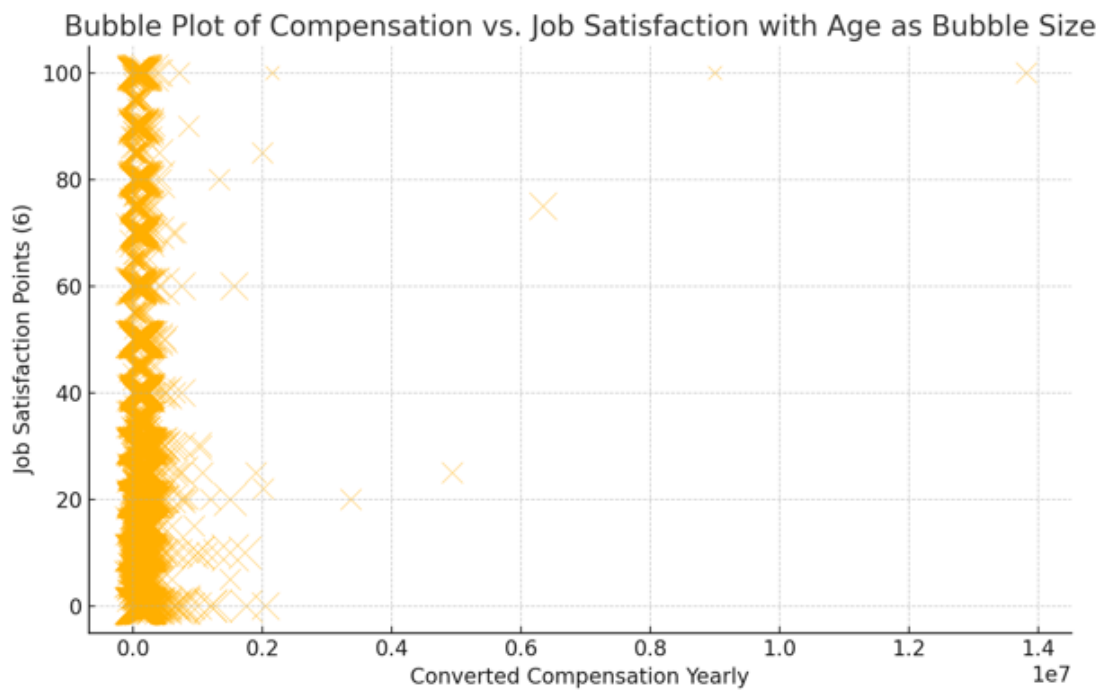

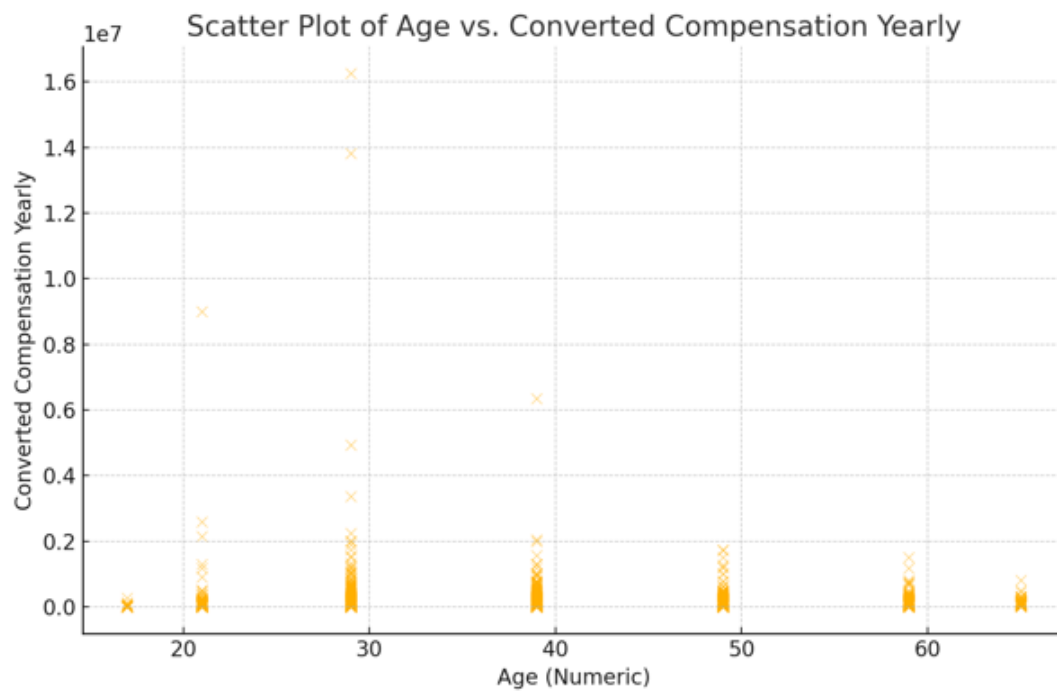

Age vs. Compensation

Compensation vs. Job Satisfaction

Task 3: Visualizing Composition of Data with Bar Charts

1. Horizontal Bar Chart of `MainBranch` Distribution

Visualize the distribution of respondents' primary roles to understand their professional focus.

2. Vertical Bar Chart of Top 5 Programming Languages Respondents Want to Work With

Identify the most desired programming languages based on `LanguageWantToWorkWith`.

3. Stacked Bar Chart of Median `JobSatPoints_6` and `JobSatPoints_7` by Age Group

Compare job satisfaction metrics across different age groups with a stacked bar chart.

4. Bar Chart of Database Popularity (`DatabaseHaveWorkedWith`)

Identify the most commonly used databases among respondents by visualizing `DatabaseHaveWorkedWith`.

Developer Survey Analysis

Distribution of Respondents' Primary Roles

Top 5 Programming Languages

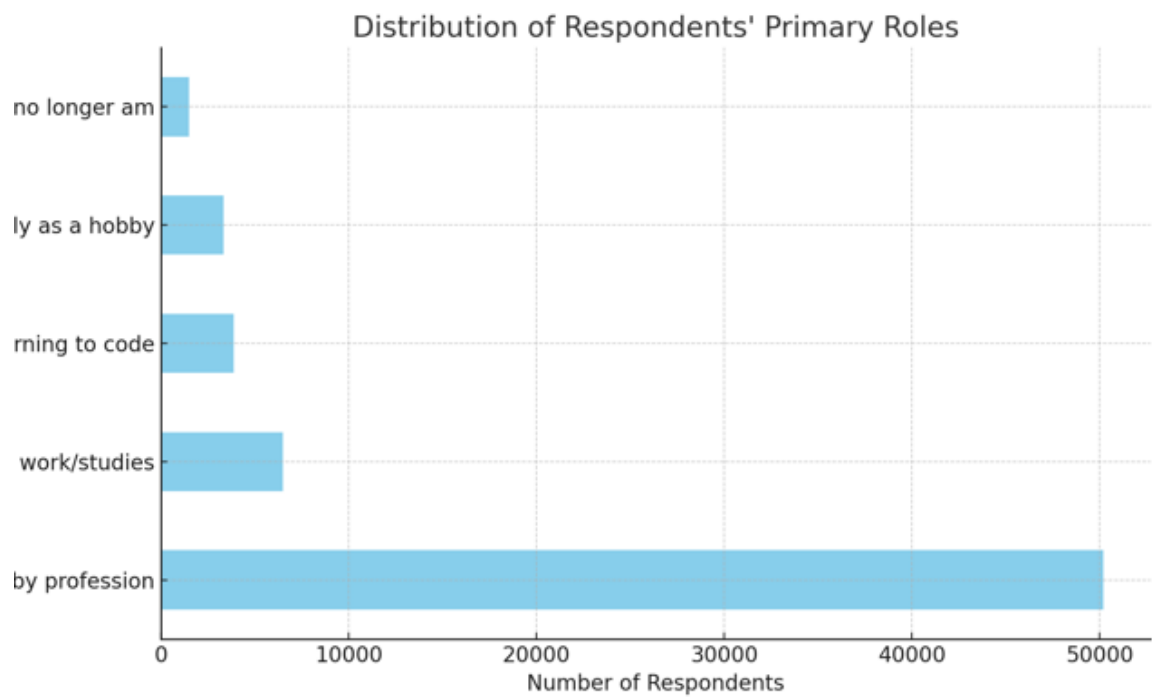

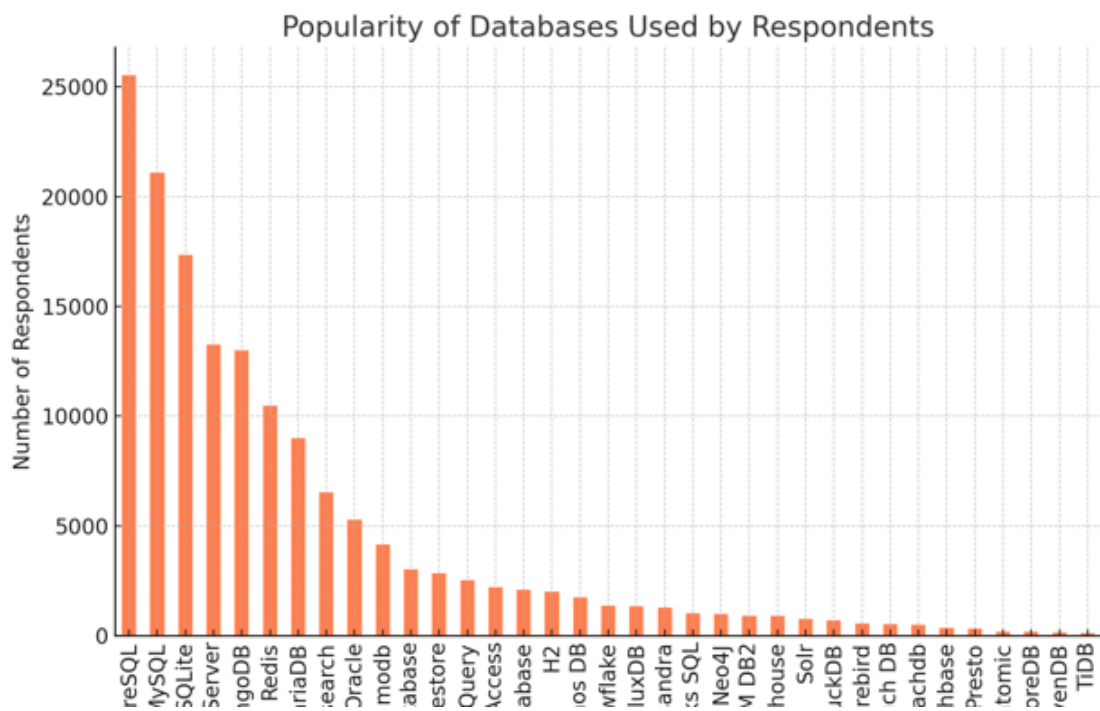

Job Satisfaction by Age Group

Database Popularity

Task 4: Visualizing Comparison of Data with Bar Charts

1. Grouped Bar Chart of Median `ConvertedCompYearly` for Different Age Groups

Compare median compensation across multiple age groups with a grouped bar chart.

2. Bar Chart of Respondent Count by Country

Show the distribution of respondents by country to see which regions are most represented.
